November 6 *Buckthorn*

Meet at the Water Dept parking lot. Tools and training provided.
To help out email Deb at fpr@cambridgema.gov or call 617.349.6489

** Native species allow natural ecosystems to function, giving us clean air and water, stable slopes and embankments, and diverse habitats and food sources for native animal species. Non-native species, in absense of natural controls, can break down environmental functions and displace native plant and animal communities.*
