In the past several years, the E. Comb. Community has seen much development, which has resulted in a large amount of square footage for biotech, many ~~[illegible]~~ housing units and some high end restaurants, but not too much for the community, except for ~~one or two~~ ~~[illegible]~~ in the way ~~which have fallen off the table during negotiations w/ developers~~ such as a smattering of affordable housing ☆

In making a decision about the foundry building, I urge each of you ~~to consider~~ to put the greater good of the community first, ~~before and put that ahead of the interests of developers and the~~ and finance the upgrades, so that it will be an asset for ~~[illegible]~~ us all, & not just another high priced commercial property.

☆ and a small field -
