PS My activism at this point is centered on divestment of institutions from fossil fuels, and on stopping the pipelines (Keystone XL and the Northeast Pipeline), because solving the climate crisis is literally the sine qua non. I'm working with 350MA.org.
-- And notice: over 95,000 people have signed Credo's pledge of civil disobedience alone (there are others) in connection with the pipeline.. Finally, finally, this movement is taking off. Better late than never!

Subject: Returned mail: see transcript for details

1. Public toilets are not just desirable for the homeless; all of us occasionally wish they exist, and especially those of us who are older, and/or disabled. Public toilets ideally should be handicap-acessible.

2. The ethanol train remains a threat; the City should weigh in on this further with the State legislature.

3. I am very glad to hear about the cooperation of the Globe regarding the Globe Direct. However, I would like to point out that some of us want these deliveries; the sales flyers can be an important part of meeting a tight budget. There is, moreover, a problem in that they are oftn delivered late (sales start Friday morning; they often arrive late Saturday.) In my area at least (North Cambridge, Cameron Ave.) they are delivered by the mailpersons into the mailbox, so there is no litter problem.

4. I applaud the support of Harvard regarding fossil-fuel divestment. Now the City should do the same!
