Subject: Support for Policy Order #6 on June 2 Agenda

I would like to express my support for Policy Order #6 on Improving the design of New St. in West Cambridge. This area is going through a rapid transformation that is making it more dangerous for the users of one of the City's main public spaces, Danehy Park, as well as for all cyclists and pedestrians in the neighborhood, and that will inevitably create more traffic and hazards in the Fresh Pond Mall parking lot (currently used as a street) and the Fresh Pond Parkway//Alewife intersections which currently fail all reasonable standards for traffic, with resulting air pollution, loss of time, etc.

It also appears to me that there is also a serious lack of affordability in the residential development of this area, as well as lack of proper transportation planning and access to transit.

Thank you very much for conveying my support to the City Council and Mayor.

Yours sincerely,

Alison Field-Juma
