Subject: Manager's agenda #22 - world cup political reality

Any public display of the world cup on jumbo tvs in Central Square should also include a statement condemning the destruction of people's communities in Brazil which made the games possible.

We cannot try to build community here at home on the backs of the poor in Brazil. I am not trying to spoil the games for anyone, but we cannot ignore the political reality of what is happening.

Perhaps it would be better to pass on a public endorsement of the games if we cannot or will not bring political balance to the situation on the ground.
