OFFICE OF THE CITY CLERK
CAMBRIDGE, MASSACHUSETTS

City Council
795 Massachusetts Ave
Cambridge MA

Dear Cambridge City Council,

Thank you for signing onto our letter in support of S 1664: An Act Improving Neighborhood Solar and Net-Metering in the Commonwealth and H 1776: An Act Relative to Net-Metering. Sixteen other communities and 56 solar businesses also signed onto the letter in support of these bills, which would raise the solar net-metering cap. Enclosed is a full list of signatories to the letter.

Recently, the language of these bills was incorporated into a larger piece of energy legislation in the Massachusetts State Senate, S 2200: An Act Relative to Competitively Priced Electricity in the Commonwealth. This is a comprehensive bill making refinements to the state's renewable energy and energy efficiency programs.

The net-metering improvements were adopted in response to renewable energy businesses across the commonwealth warning legislators that if the cap isn't raised, the solar industry would be unable to expand, and growth in the clean energy sector would plateau, causing businesses to shrink their workforce, and look towards other states to continue to grow. If we want to continue to be a hub of the solar industry, we must expand this program now. Leading solar businesses have been clear that failing to expand this critical solar program soon could cripple the solar industry in Massachusetts.

The Senate passed S 2200 by a unanimous vote, bringing us one step closer to raising the solar net-metering cap in Massachusetts. Your support was critical for advancing this legislation. In order raise the cap, the bill must still pass the Massachusetts House. I encourage you to contact your Representative and urge them to support this important clean energy legislation

Thanks again for your support,

MacKenzie Clark
