

Keep Cambridge Livable for its Residents!

27

Whereas:

Cambridge is one of the densest cities in the Commonwealth;

Many residents are being driven out of the city by high rents and housing prices;

Private developers are seeking zoning changes to allow high-rise office, lab, and market-rate apartment buildings in Kendall Square, Central Square, Alewife, and Northpoint that will continue to drive rents and housing prices up;

The tens of thousands of additional auto, bus and truck trips per day generated by new development will intensify traffic congestion, worsen air quality, and make the streets less safe, especially for children and elderly pedestrians;

High-rise development threatens to create shadows and wind tunnels, block sky views, increase noise pollution, remove green space, and thereby diminish the quality of life for all residents;

There is no current and complete Master Plan for the city's equitable development;

Most residents have not been informed of the enormity of the proposed changes or have been denied meaningful input;

Therefore:

We call upon the Cambridge City Council to declare a minimum one-year moratorium on up-zoning in Kendall Square, Lafayette Square, Central Square and Alewife Brook Overlay Districts until a comprehensive study assessing the impact of *all* the proposed development is presented to the neighborhood associations and brought to the City Council for a public discussion.

Keep Cambridge Livable for its Residents!

Whereas Cambridge is already one of the densest cities in the Commonwealth, with streets, trains, buses, bike lanes, parks and playing fields near saturation;

And whereas private developers are proposing oversized high-rise office and market-rate apartment construction reducing green space and open space at Kendall Square, Lafayette Square, Central Square, Alewife Brook and Northpoint;

And whereas the increase of tens of thousands of auto, bus and truck trips per day threatens to choke major streets throughout the entire city, to intensify accident hazards to children going to and from school, after-school and sports, and to increase air pollution and its attendant health problems;

And whereas this over-development will lower the quality of life for current residents, without lowering the cost of housing;

Therefore be it resolved that the Cambridge City Council declare a minimum one-year moratorium on amendments to the Zoning Ordinance and Map in Kendall Square, Lafayette Square, Central Square and Alewife Brook Overlay districts until:

A comprehensive plan assessing the impact of the total construction and traffic increase has been presented to neighborhood associations; their input and evaluation has been received by the Council; and the issues have been thoroughly examined before the City Council.

Keep Cambridge Livable for its Residents!

Whereas Cambridge is already one of the densest cities in the Commonwealth, with streets, trains, buses, bike lanes, parks and playing fields near saturation;

And whereas private developers are proposing oversized high-rise office and market-rate apartment construction at Kendall Square, Lafayette Square, Central Square and Alewife Brook;

And whereas the increase of tens of thousands of auto, bus and truck trips per day threatens to choke major streets throughout the entire city, impeding the ability to get to and from work, and to intensify the hazards to children going to and from school, after-school and sports;

And whereas this over-development will lower the quality of life for current residents, without lowering the cost of housing;

Therefore be it resolved that the Cambridge City Council declare a minimum one-year moratorium on the granting of further up-zoning permits in Kendall Square, Lafayette Square, Central Square and Alewife Brook until: A comprehensive plan assessing the impact of the total construction and traffic increase has been presented to neighborhood associations; their input and assessment has been received by the Council; and the issues have been thoroughly examined by the City Council.

Keep Cambridge Livable for its Residents!

Whereas Cambridge is already one of the densest cities in the Commonwealth, with streets, trains, buses, bike lanes, parks and playing fields near saturation;

And whereas private developers are proposing oversized high-rise office and market-rate apartment construction reducing green space and open space at Kendall Square, Lafayette Square, Central Square, Alewife Brook and Northpoint;

And whereas the increase of tens of thousands of auto, bus and truck trips per day threatens to choke major streets throughout the entire city, to intensify accident hazards to children going to and from school, after-school and sports, and to increase air pollution and its attendant health problems;

And whereas this over-development will lower the quality of life for current residents, without lowering the cost of housing;

Therefore be it resolved that the Cambridge City Council declare a minimum one-year moratorium on amendments to the Zoning Ordinance and Map in Kendall Square, Lafayette Square, Central Square and Alewife Brook Overlay districts until:

A comprehensive plan assessing the impact of the total construction and traffic increase has been presented to neighborhood associations; their input and evaluation has been received by the Council; and the issues have been thoroughly examined before the City Council.

Cherry St., Cambridge, MA 02139; Attn. Roscoe Thomas Area 4 Coordinator

Keep Cambridge Livable for its Residents!

Whereas Cambridge is already one of the densest cities in the Commonwealth, with streets, trains, buses, bike lanes, parks and playing fields near saturation;

And whereas private developers are proposing oversized high-rise office and market-rate apartment construction reducing green space and open space at Kendall Square, Lafayette Square, Central Square, Alewife Brook and Northpoint;

And whereas the increase of tens of thousands of auto, bus and truck trips per day threatens to choke major streets throughout the entire city, to intensify accident hazards to children going to and from school, after-school and sports, and to increase air pollution and its attendant health problems;

And whereas this over-development will lower the quality of life for current residents, without lowering the cost of housing;

Therefore be it resolved that the Cambridge City Council declare a minimum one-year moratorium on amendments to the Zoning Ordinance and Map in Kendall Square, Lafayette Square, Central Square and Alewife Brook Overlay districts until:

A comprehensive plan assessing the impact of the total construction and traffic increase has been presented to neighborhood associations; their input and evaluation has been received by the Council; and the issues have been thoroughly examined before the City Council.
