**Subject:** Vote on MIT Zoning Proposal

Dear Council Members,

I am unable to attend tonight's meeting but I wanted my thoughts on the MIT zoning proposal to be noted on the official record.

If Cambridge is serious about wanting to promote policies that slow global warming, I think we need to be willing to look at increasing the zoning on height. We need to promote increased density. And if we are serious about increasing economic diversity in our city, we need more middle income housing.

Therefore, I am in support of the amendment that Councilor Chung will introduce tonight to increase the height cap on MIT's residential tower from 300 feet to 350 feet. I want more housing, in particular more middle income housing.

Sincerely,

Carolyn Fuller
