**Subject:** MIT Development proposal due for vote on Monday night.

I understand that there is a vote scheduled on MIT development proposal in Kendall Square. I read this in the Chronicle and have been discussing this with neighbors. MIT is in the middle of a grad student housing study. I would suggest that the proposal Kendal Sq proposal be allowed to expire until the study is complete; the results of the study could change how MIT sees the project and might give the CDD and Council more important information. It is important not to let it become an inevitability except for the little details. I know a project of this magnitude has a lot of time and energy behind it. (But so did the inner belt and that never happened largely because of community opposition.)

I support Letting it expire.  
Thank you for this opportunity to speak.
