Subject: Pass the Teague Petition "as written"

Please enter this into the official record:

To: City Council

It is time to update the city's outdated regulations on outdoor lighting to be in compliance with today's technology.

This has to do with spotlights that are affixed to buildings and which shine in the windows of abutting residences, thus adversely affecting the Quality of Life of many Cambridge residents and voters. This has an effect on sleep patterns for all ages.

This is concerned with exterior lighting over a certain lumen designation.

This will not affect the front porch light on private residences, in spit of a ludicrous comment by a member of the Planning Board.

Vote for the Quality of Live of Cambridge voters and residents and **pass** this **petition**.

Respectfully,
Carolyn Shipley
