To the Cambridge City Council:

As your constituents, we urge you to carefully consider and pass the attached legislation, "An Ordinance of the City of Cambridge Prohibiting the Use of Wild and Exotic Animals in Traveling Shows and Circuses." We appeal to your sense of compassion for the animals and safety for our community.

OFFICE OF THE CITY CLERK  
CAMBRIDGE, MASSACHUSETTS

According to the **Massachusetts Protection of Cruelty to Animals MSPCA:**

"The inherent cruelty of traveling almost every week a year, forced separation of herds and babies, being chained while not performing, restrictive caging, and coercive training methods are just a few of the reasons why the MSPCA does not believe circuses that use wild animals are humane."

According to the **Humane Society of the United States (HSUS):**

"ELEPHANTS who have endured inhumane training methods sometimes strike back at their trainers or rampage through audiences, causing injuries and death. Circus lions and tigers have escaped and performing chimpanzees have injured audience members when adequate barriers were not in place. . . There's no telling when they might attack or attempt to flee. . ."

Also disturbing is the fact that elephants can transmit and have transmitted tuberculosis to humans. Some elephants in circuses have been found to have a human strain of tuberculosis. These animals pose a serious health risk since they are in contact with the public during publicity events. For reasons of compassion and public safety, we urge you to pass "An Ordinance of the City of Cambridge Prohibiting the Use of Wild and Exotic Animals in Traveling Shows and Circuses."

Sincerely,
