Subject: Support for Master Plan

Dear City Councilors,

We are writing to express our support for the Carlone/Mazen/Simmons proposal for a Master Plan that would provide guidelines for long-term development in the city. We are dismayed by the ad hoc approach to development that the city has taken in the past and hope we can turn that page. We are concerned about the displacement of long-term residents, the encroachment on neighborhoods by large commercial buildings, and the increased traffic and congestion brought on by development without forethought and planning.

We are unable to attend Monday's council meeting, but want to register our support for the proposal.

Thank you,
Andrea Nash and Peter Berry
