Subject: Oppose electric signs in Cambridge

Thank you, and the Community Development Department, for what you have done to date to slow down the state's electronic-billboard approval process and assure that Cambridge is not bowled over by the state's process or by the state's approval.

I encourage Cambridge City Council to continue doing everything possible to oppose state-authorized electronic advertising billboards in Cambridge. While we encourage business and businesses, Cambridge is a residential city first and foremost, a place that attracts the best and the brightest, not only as students but also to settle. Business makes this possible, but the residential feel of the city is what makes it welcoming and a place people stay to raise their children and to retire. Help us maintain as much as possible Cambridge's landscape and culture.

Thank you.

Sincerely,
Diana Goldfarb
95 Kinnaird St.
Cambridge
