**Subject:** Telecommunications, Common Carrier

I support common carrier status for telecommunications services in Cambridge.

STATE OF THE ART:

Today we in the process of rebuilding each street in Cambridge. Huron Avenue is dug up daily and repeatedly to make way for sewer separation with pipes larger than some cars. It seems only reasonable and forward thinking that while we dig, we install fiber optic for common use of carriers and Cambridge. Someday we can connect these fibers to each residence. Even a 3-way duct bank capable of carrying at least 6 and potentially many more fiber optic cables each with multiple fibers is less than 5% the size of a single sewer pipe.
