Subject: Zoning petition on tonight's agenda

I suggest that the Carlone et.al petition be sent to the Ordinance Committee for discussion.....it is certainly worth having a hearing. I am not as smart as those who have jumped on the bandwagon, for and against...A Better Cambridge urges no and the Cambridge Residents Alliance urges yes. Hundreds have signed petitions for or against. In the midst of the surge, no one has answered questions about the possible impact on building low and moderate income housing. No one can say how the Council could deal effectively with special permits when so little progress is being made on a reform of affordable housing contributions or inclusionary zoning regulations that would help achieve the universal goal of more affordable housing.
