Re:

Petition #5, The Carlone Petition

I have signed the Carlone Petition in support of the City Council members taking responsibility for the oversight and final approval of large development projects that require zoning relief (Project Review Special Permits) until the Master Plan process is completed.

It is clear that the volunteers on the Planning Board have been working without the benefit of a Master Plan, and the results have been abysmal. Drive past the complex at the junction of Wheeler Street and Concord Avenue for a example of poor planning and special permitting gone awry.

Our city and the residents deserve better planning. Please support The Carlone Petition so that we can move towards good sustainable growth and development.
