21 Sept 2014 New York City – My Favorite Photos

1. We are dripping away our chances of maintaining a verdant and productive climate for our planet and all of us on it.
2. corner of Central park West and 72nd St.
3. The World Wildlife Fund gave out 5000 of these t-shirts and they were long gone before I got there. I saw maybe 50 all day. For every ONE that I saw- there were 100 others I didn't see.
4. a wonderful machine powered by four bicycles. The blue vertebrae are cut from quart oil bottles – much of the rest from car parts
5. Lorax Girls I urge you to re-read the Dr. Seuss book – The Lorax with some one young of heart whom you love.
6. These are ordinary folks who work to get us from point A to point B. They marched because they know we need to Stop Carbon Pollution
We need alternatives to Fossil Fuels.
7. I urge you all to ACTION – here in our CITY – I particularly think we can do some wonderful things with the transportation sector and with the building sector. I encourage you to imagine a light rail system – maybe down to the River from mass Ave near Central square and along Memorial Drive – hooking conveniently into the red line stops.

Thank You
Susan Ringer

Save the Humans

Lorax Girls

New York Transit Workers Union

i used to
say, "someone
should do
something about
that!" Then i Realized
**i am
someone!**
