**Communications: 11/ 17/2014,to the Council from Peter Valentine 37  
Brookline St. Concerning the nuclear waste death of the United  
States of America**

**Recently on the international radio program Coast to Coast  
Hosted by Richard Syrett on 11/15/2014**

**guest Dr. Richard Allan Miller, a scientific genius who has worked on  
numerous government projects and has an above top secret  
clearance, stated that all the nuclear reactors in the USA had to be  
shut down because they're old and leaking hazardous nuclear waste.  
Add to that leakage during transporting such.**

2014 NOV 20 PM 12:03  
OFFICE OF THE CITY CLERK  
CAMBRIDGE, MASSACHUSETTS

**If this problem isn't corrected the fate of the USA will then be worse  
than Japans' due to its recent nuclear catastrophe. As well as this  
nuclear poison entering the waters of the Pacific, Japans' land has  
become too poisonous to live on.**

**Japan had to go to Russia for help. Russia gave them two islands to  
move to.**

**That will not be the case if the USA land is allowed to be poisoned by  
nuclear waste gradually spreading everywhere.**

**I am giving you this information because it is my duty as a USA citizen  
to defend my nation as I am able. As it is yours.**

**I have given this information to the President of MIT, because it is a  
major center for scientific investigation and innovation.**

P2U2

**And therefore it is its' duty as a national technological institution to participate in the creation of an Earth harmonious form of this level of energy.**

**To say the least the city government of Cambridge, MA must contact the appropriate national government agency overseeing this matter and request a complete investigation and thereafter be informed of what corrective action will be taken.**

**Somehow spreading the word about this extremely serious situation will help ignite action. The populace of the USA as well as becoming sick in numbers too large to handle, cannot be moved to a safe little island. Pledging allegiance to the nation means more than just spewing a few words. It demands ACTION.**
