

Communications: To The Capital of The Planet Earth Cambridge, MA USA
From Peter Valentine 37 Brookline St 4/14/2015 15

The Future of Technology is the Same Future as when it first
Began

The Spear

The Wheel

The Wall

1. To keep Life Safe
2. To Make Life a Richer Experience
3. To sustain solid Life Focus
4. To evolve all the methodologies to build the world you want to live in
5. To evolve the best mind methodologies to navigate through the External and Internal Vastness of Existence
6. Creation knows when Enough is Enough. When creation brought you forth, it knew where your nose was supposed to be. It didn't keep on going and try to add a few more noses coming out of your ear.
7. To live in a musical way so that everything fits in a way that you like.
8. Metal and Complexity think they have the power to overwhelm, but they forget that they both come from and came from Thought.

2015 APR 14 PM 12 31
OFFICE OF THE CITY CLERK
CAMBRIDGE, MASSACHUSETTS

Therefore the Future of Technology is a Supreme Forum of
Playful Thought About Everything
