#### Description

#### Outdoor Signs Include Reservoir Base & 30" x 40" Snap Frames

Outdoor signs position your advertising graphics in the most prominent locations, such as outside of a business. Passersby have to pay attention to these pavement boards as they are walking or driving to their destination. These business signs, outdoor signs include a double-sided 30"w x 40"h poster frame, equipped with snap-open edges for easy graphics updates. We also provide these pavement boards with non-glare lenses to cover and protect your displayed posters. These outdoor signs, also known as outdoor signage holders, feature a water-fill base to increase your presentation's overall stability. A reservoir base can also be filled with sand! For this reason, we recommend using the outdoor signs in high-volume locations. These models work well within a strip mall or on a sidewalk.

These outdoor signs were made specifically for use outside of a business, retail store or restaurant. Many businesses use these pavement boards to inform passersby about specials and sales. The outdoor signage, outdoor signs utilize springs to attach the aluminum poster frames to the water-fill base. These springs will prevent your business signs from toppling over during high winds or large amounts of traffic. The outdoor signs also include a built-in handle and wheels to help you reposition your business signs with ease. The wheels are great for bringing in the display at night. Outdoor signs, such as outdoor signage, will generate even more interest in your business as you will reach new audiences using outdoor signage.

**Please Note:** While these outdoor signs are designed primarily for use outdoors, they are not intended for use during inclement weather, including heavy rain, snow and high wind conditions. These outdoor signs are not "seal-tight" and therefore water can seep in under the lens, potentially affecting signage in the frame. We always recommend bringing these business signs inside during such conditions, as well as overnight.
