

## **Muscular Dystrophy Association**

Since 1950, the Muscular Dystrophy Association (MDA) has provided the Greater Boston area with a comprehensive network of research and patient services. We support adults, children, and their families affected by one of 43 neuromuscular diseases, including Amyotrophic Lateral Sclerosis (Lou Gehrig's Disease) and Duchenne Muscular Dystrophy. MDA provides everything from support groups and clinics to summer camp and wheelchair repair.

MDA is a voluntary health organization covering the United States and Puerto Rico with its services. Almost all of its fundraising comes from voluntary public donations raised throughout the year. The association seeks no government funding, United Way funds, or fees from those we serve. MDA is consistently rated one of the most efficient of national voluntary health agencies.
