**Subject:** Re Policy order #18 Cambridge switch to renewable energy

To the Cambridge City Council,

I am writing to express my support of Councilor Carlone's policy order that the City of Cambridge not renew our agreement with TransCanada for our electricity and that we change to a supplier that relies on 100% renewable energy.

We must be responsible for taking care of our planet and cutting carbon emissions. TransCanada is trying to get the Keystone Pipeline developed which would greatly harm the environment. We must listen to the science, and do what we can to make the world a safer place and help stop the pace of climate change. I urge each of you to support this policy. Cambridge should do the right thing, and be a leader in this important movement.

Sincerely,

Jan Puibello
