**Cc:** Lopez, Donna  
**Subject:** Obtain municipal electric power from renewable sources

To the Cambridge City Council:

We are writing in support of Councillor Carlone's proposed order requesting the City Manager to seek a new municipal power supplier that will supply energy from renewable sources. Control of global warming is a crucial issue for the entire world, but particularly close to home for the city we have lived in and loved for more than 40 years, which is highly vulnerable to flooding and other destructive outcomes as sea levels rise. Our current supplier, Trans Canada, is a major promoter of tar sands oil extraction, a particularly harmful form of fuel production. We now have an opportunity to contribute symbolically and concretely to the effort to slow and reverse this climate threat. I urge you to vote for and pass this order as a step toward preserving our city.

Yours truly,  
Noel Jette and Alan Zaslavsky
