**Subject:** Please support Policy Order #18

Dear City Councillors,

Each month when I pay my NSTAR bill I feel good knowing that every kilowatt hour I use is being offset by my support of 100% wind-powered electricity. I feel good because, as a mother, I cannot continue to support the burning of fossil fuels and the destruction of the planet our children have inherited.

2015 is the year the United Nations Intergovernmental Panel on Climate Change has identified as the necessary PEAK year for global carbon emissions. *This* is the year we must veer off our current path to a clean-energy future. Please help us do that in the City of Cambridge. The longer we wait, the more difficult and costly it becomes to preserve a stable climate.

I am writing to ask you to support Policy Order #18. Dennis Carlone has proposed that the City Manager not renew the contract with TransCanada for electricity for municipal buildings and instead pursue a contract with a supplier that offers 100% renewable electricity.

I urge you to please vote in favor of Policy Order #18. And to switch your own home to clean energy with [www.MassEnergy.org](http://www.MassEnergy.org). Tell them a Mother Out Front sent you.

Best,

Nina Dillon
