Subject: Order 18

Dear City councillors
I have written to you about this before.

I urge you to take the leadership and pass order 18 today. Our city can serve as a leader to other municipalities and switch to renewable energy. As you know, our dependence on fossil fuels for the past 150 years is causing a profound release of carbon into the atmosphere and changing the balance of life as we know it. I think of these decisions --- switching to renewable energy--- which we have done at our house, as a choice for our children.

Thank you
Peggy Lynch
