City Council,

Thank you for passing the Mass + Main zoning proposal to a second reading. Please proceed to ordain this zoning proposal. Central Square is the location of both the red line and six bus lines . The square both can and should support an increase in density. Coincidentally, on May 4th, you will also be considering the report of the NetZero committee, a program that aims to reduce green house gas emissions from Cambridge buildings. These topics are linked. I would submit to you that the increase in density proposed in the Mass + Main zoning proposal is a important part of the larger issue of reducing green house gas emissions from our whole region. Cambridge can and should do it's part to help keep our planet livable. This is perhaps the greenest action you will take all year. Again, thank you.

Gregory P Heidelbergger
188 Prospect Street
