Dear Councilor Benzan,

The city has adopted Complete Streets as a citywide policy, so when the topic of Pearl Street again comes up for discussion at tonight's Council meeting I hope you will continue to keep that policy in mind and not vote to abandon any further study of how Pearl Street can become a more complete street.

Last night I was one of a few hundred who attended the kickoff event for Divest Harvard's "Heat Week" and have been reflecting deeply on the climate crisis we are facing globally and on the moral obligation of well resourced institutions like Harvard and cities like Cambridge to set an example others can follow.

Please vote for a less auto-dependent future, not to maintain the status quo.
