Subject: comments on curbside compost collection and decreased plastic bags.

Hi Margaret!

I hope you're well. I'm on Craig Kelley's email list and he sent me a notice of the Environment Committee's discussion of this topic. So here are my four cents:

1) I don't know how well curbside compost collection is working, but three cheers for the mixed recycling bins--so much easier to deal with! I hope it's working from the collection point of view.

We are serious composters and have a backyard bin, but am concerned that most folks won't or can't do that, especially renters. I hope you are able to find a way to continue curbside compost pick up.

2) Couldn't be more strongly supportive of decreasing plastic bags. I'd love to see them banned in Cambridge--doesn't San Francisco do that?

Take care,
Julie
