Switzerland.

Global Transportation: At a Crossroad

Worldwide mobility has increased significantly over the past decades and humans have profited enormously. But we are at a turning point: most transportation is no longer sustainable.

Join us for a panel discussion that will examine the systems and policy approaches - as well as public attitudes - required to foster a robust rail system for the 21st century. Eric Cosandey, from the engineering firm SMA, will help us understand the Swiss example to see what the U.S. can learn in creating a more efficient, equitable and environmentally responsible set of transportation options in its urban centers.

When: Friday, May 21, 2010
9.30 a.m. – 11.00 a.m.

Where: Cambridge Public Library L2 (Lecture Hall)
449 Broadway, Cambridge

Speakers: Eric Cosandey, SMA + Partners
Amy Cotter, Metropolitan Area Planning Council (MAPC)
Peter Furth, Northeastern University
William Lyons, Volpe Center, U.S. Department of Transportation

Features: Welcome Breakfast (8.30 a.m.) at swissnex Boston, Consulate of Switzerland
420 Broadway, Cambridge (across the street from the Public Library)
Exhibit Sustainable Transportation (created by the Embassy of Switzerland in Washington D.C., in collaboration with the Federal Office of Transport in Switzerland)

RSVP: Seating is limited. Please register [here](#).
