

## Public Meeting on Stormwater Management Program Wednesday, March 24

The Cambridge Department of Public Works is holding a public meeting to discuss the City's efforts in the implementation of its Stormwater Management Program on **Wednesday, March 24<sup>th</sup>, at 6:30 P.M.**, in the Frasier Building (DPW) conference room at 147 Hampshire Street.

The City developed its Stormwater Management Program based on the requirements established under the U.S. Environmental Protection Agency's (EPA) National Pollution Discharge Elimination System Phase II (NPDES Phase II) regulations in 2003 and revised it in 2006. EPA's NPDES Phase II Stormwater Management program provides a framework for improving the quality of stormwater discharges to waterways through the identification of six minimum control measures. The City's Stormwater Management Program identifies stormwater management activities that address the NPDES Phase II program's six minimum control measures, which are:

- Public education and outreach
- Public participation and involvement
- Illicit discharge detection and elimination
- Construction site runoff control
- Post-construction runoff control
- Pollution prevention and good house keeping measures

For more information about the meeting or the NPDES Phase II Stormwater Management Program, contact Catherine Daly Woodbury, DPW Engineering Project Coordinator at 617/349-4818 or visit
