Subject: Bishop petition

My name is Juan Roitman. I live in North Cambridge 14/16 Harrison Ave. I'm truly concern about the plans for building four-story apartments in the neighborhood. This neighborhood is already exposed to increased traffic during rush hours and most alarming, continuous flooding of our basements which was not the case in past years. Adding more family homes will only make matters worse, and I could make a long list of reasons for that, not just the two mentioned above.

We should make everyone aware about the stress imposed to our environment not just for us, but most importantly for the generations to come; therefore the City council should take this matter seriously and protect its city and community.

I strongly support the Bishop petition and hope that the city Council will try to reduce the damage that this development will cause.

Sincerely,

Juan Roitman
