Subject: Re: Forest City

To: the Cambridge City Council,

I am truly surprised and disappointed in the council for many reasons. Actually shocked!

1. changing the meeting at the last minute, really - when it is summertime and people are away and have rearranged their schedules to come to a meeting - that they don't get paid to attend.
2. I feel that the people who showed up last night have Cambridge's best interests at heart - at least a Cambridge that is livable and it is the community that we chose to live in for many reasons. High rise buildings and high density development is not one of those reasons.
3. Forrest City does not have the city's best interest at heart. They don't live up to their agreements from the sound of it and the building(s) that they build will be there looming over us for many years to come. It will increase traffic, (which is already horrendous), impact the air quality, parking is already minimal, and generally snarl up the city.
The Central Square plan is a whole other ballgame that doesn't make sense at this point.

I hope that the council will do the right thing. This doesn't have to be complicated - think about it.. people do come first.

Sincerely,
Joyce Singer
