City of Cambridge CORI Policy

1. Where Criminal Offender Record Information (CORI) checks are part of a general background check for employment or volunteer work, the following practices and procedures will generally be followed.
2. CORI checks will only be conducted as authorized by Criminal History Systems Board (CHSB). All applicants will be notified that a CORI check will be conducted. If requested, the applicant will be provided with a copy of the CORI policy.
3. An informed review of a criminal record requires adequate training. Accordingly, all personnel authorized to review CORI in the decision-making process will be thoroughly familiar with the educational materials made available by the CHSB.
4. Prior to initiating a CORI check, the City will review the qualifications of the applicant to determine if the applicant is otherwise qualified for the relevant position. The City will not conduct a CORI check on an applicant that is not otherwise qualified for the relevant position.
5. Unless otherwise provided by law, a criminal record will not automatically disqualify an applicant. Rather, determination of suitability based on CORI checks will be made consistent with this policy and any applicable law or regulations.
6. If a criminal record is received from CHSB, the authorized individual will closely compare the record provided by CHSB with the information on the CORI request form and any other identifying information provided by the applicant, to ensure the record relates to the applicant.
7. If, in receiving a CORI report, the City receives information it is not authorized to receive (e.g. cases with dispositions such as not guilty or dismissal, in circumstances where the City is only authorized to receive convictions or case-pending information), the City will inform the applicant and provide the applicant with a copy of the report and a copy of CHSB's *Information Concerning the Process in Correcting a Criminal Record* so that the applicant may pursue correction with the CHSB.
8. If the City of Cambridge is planning to make an adverse decision based on the results of the CORI check, the applicant will be notified immediately. The applicant shall be provided with a copy of the criminal record and the City's CORI policy, advised of the part(s) of the record that make the individual unsuitable for the position and given an opportunity to dispute the accuracy and relevance of the CORI record.
9. Applicants challenging the accuracy of the criminal record shall be provided a copy of CHSB's *Information Concerning the Process in Correcting a Criminal Record*. If the CORI record provided does not exactly match the identification information provided by the applicant, the City of Cambridge will make a determination based on a comparison of the CORI record and documents provided by the applicant. The City of Cambridge may contact CHSB and request a detailed search consistent with CHSB policy.
10. If the City of Cambridge reasonably believes the record belongs to the applicant and is accurate, then the determination of suitability for the position will be made. Unless otherwise provided by law, factors considered in determining suitability may include, but not be limited to the following:
 - (a) Relevance of the crime to the position sought;
 - (b) The nature of the work to be performed;
 - (c) Time since the conviction;
 - (d) Age of the candidate at the time of offense;
 - (e) Seriousness and specific circumstances of the offense;

- (f) The number of offenses;
- (g) Whether the applicant has pending charges;
- (h) Any relevant evidence of rehabilitation or lack thereof;
- (i) Any other relevant information, including information submitted by the candidate or requested by the City.

11. The Personnel Department will assist affected departments, in assessing the suitability of candidates in accordance with paragraph 10 a through i above, to ensure consistency, fairness, and protection of employment opportunities and the public interest.

2.121.040 Waivers and Exceptions.

(a) **Waivers.** A Covered Employer may request that the City Manager grant a partial or whole waiver to the requirements of this Chapter.

(b) **General Waivers.** Waivers may be granted where application of this Chapter to a particular form of Assistance is found by the City Solicitor to violate a specific state or federal statutory, regulatory or constitutional provision or provisions, and the City Manager approves the waiver on that basis.

(c) Hardship Waivers for certain not-for-profit employers. An employer, who has a contract with the City of Cambridge which is not subject to the provisions of G.L. c. 30B, may apply to the City Manager for a specific waiver where payment of the Living Wage by a not-for-profit Covered Employer would cause a substantial hardship to the Covered Employer.

(d) Chapter 30B contract waivers. Prior to issuing an invitation for bids for a procurement contract subject to the provisions of G.L. c. 30B, any Applicable Department may apply to the City Manager for a waiver of the application of the Living Wage to the contract where payment of the Living Wage by a Covered Employer would make it inordinately expensive for the City to contract for the services or would result in a significant loss of services, because the contracted work cannot be segregated from the other work of the Covered Employer.

(e) General Waiver Request Contents. All General Waiver requests shall include the following:

- (1) The nature of the Assistance to which this Chapter applies;
- (2) The specific or official name of the Assistance and Assistance program, the statutory or regulatory authority for the granting of the Assistance, and a copy of that authority;**
- (3) The conflicting statutory, regulatory, or constitutional provision or provisions that makes compliance with this Chapter unlawful, and a copy of each such provision; and

- (2) A detailed explanation of why payment of the Living Wage would cause a substantial hardship to the Covered Employer; and

(g) Chapter 30B Contract Waiver Request Contents. A Chapter 30B contract waiver request shall include the following:

- (1) The nature of the Assistance to which this Chapter applies;
- (2) A detailed explanation of why the contracted work cannot be segregated from the other work of the bidding Covered Employers thereby making the cost of the contract with the payment of the Living Wage inordinately expensive or would result in a significant loss of services;

(h) Community Advisory Board review and recommendation regarding waiver requests. The Community Advisory Board, as described in Section 2.121.070 of this ordinance, shall consider waiver requests along with their supporting documentation and analysis, and may hold a public hearing to consider the views of the public before making a recommendation to the City Manager regarding the waiver request. For a hardship waiver, the Community Advisory Board shall offer an opportunity to be heard to employees of the Covered Employer. After reviewing the recommendation of the Community Advisory Board, the City Manager may approve and grant or deny all or part of a request. The City Manager may in his or her discretion grant a temporary hardship waiver pending the hearing before the Community Advisory Board. For Chapter 30B contract waivers, the Community Advisory Board shall make its recommendation to the City Manager no more than thirty days after it is notified of the request for a Chapter 30B contract waiver.

(i) Terms of exceptions. If an employer is subject to this Chapter as a result of its receipt of more than one kind of Assistance covered by this Chapter, and if the City Manager grants a waiver with respect to one form of Assistance, the City Manager need not find that this Chapter is inapplicable to the employer with respect to another form of Assistance received by the employer.

Said court, in the case of a refusal to comply with any such subpoena, after notice to the person subpoenaed, and upon finding that the attendance or testimony of such witnesses or the production of such books, papers, records, and documents, as the case may be, is relevant or necessary for such hearings, investigation, or proceedings,

(b) Complaint procedures. An employee who believes that he or she is a Covered Employee or an applicant for a position to be filled by a Covered Employee who believes that his or her employer is not complying with requirements of this Chapter applicable to the employer may file a complaint with the Applicable Department or with the Community Advisory Board. Complaints of alleged violations may also be filed by concerned citizens or by the City Council. Complaints of alleged violations may be made at any time, but in no event more than three years after the last date of alleged violation, and shall be investigated promptly by the Applicable Department. Statements written or oral, made by an employee, shall be treated as confidential and shall not be disclosed to the Covered Employer without the consent of the employee.

(c) Investigations and hearings. The Applicable Department shall investigate the complaint, and may, in conjunction with the City Solicitor, and in accordance with the powers herein granted, require the production by the employer of such evidence as required to determine compliance. Prior to ordering any penalty the applicable Department shall give notice to the employer and conduct a hearing. If at any time during these proceedings, the employer voluntarily makes restitution of the wages not paid to the employee making the complaint and to any similarly situated employees, by paying all back wages owed plus interest at the average prior year Massachusetts passbook savings bank rate, or otherwise remedies the violation alleged if the violation involves matters other than wages, then the Applicable Department shall thereafter dismiss the complaint against the employer.

(f) Remedies herein non-exclusive. No remedy set forth in this Chapter is intended to be exclusive or a prerequisite for asserting a claim for relief to enforce the right granted under this Chapter in a court of law. This Chapter shall not be construed to limit an employee's right to bring a common law cause of action for wrongful termination.

(g) Retaliation and discrimination barred. A Covered Employer shall not discharge, reduce the compensation or otherwise retaliate against any employee for making a complaint to the City, otherwise asserting his or her rights under this Chapter, participating in any of its proceedings or using any civil remedies to enforce his or her rights under the Chapter. The City shall investigate allegations of retaliation or discrimination and shall, if found to be true, after notice and a hearing, order appropriate relief as set out in paragraphs (c) and (d) herein

54A §5: Printing of ballots; arrangement of names; number of ballots.

Ballots used in elections to such a body or office by proportional representation or preferential voting shall be printed in as many lots as there are candidates for election thereto. In the first lot the names of the candidates shall appear in the alphabetical order of their surnames. In the second lot the names shall appear in the same order except that the first name in the first lot shall be placed last. In each succeeding lot the order shall be the same as that of the lot preceding, except that the first name in that preceding lot shall be placed last. Sets of ballots to be used at the several polling places shall be made up by combining ballots from the different lots in regular rotation, so that no two successive voters shall receive ballots from the same lot, and so that each candidate's name shall appear first and in each other position substantially the same number of times on the ballots used. The number of ballots provided for each polling place shall exceed by twenty per cent the number of voters entitled to vote thereat. [Added St.1938, c. 341, § 1.]

BALLOT SPECIFICATIONS

Rev. D Apr. 16/97

1. Scope

This document states the specifications for the printing and cutting of ballots to be used with the Global Election Systems Accu-Vote ES-2000 Ballot Processing Unit.

2. General

This document supersedes all previous revisions of the ballot specification.

2.1 Assumptions - This specification assumes that the ballot layout has been created by the Global Election Systems Vote Tally System (VTS) Software which generates the Postscript Level 2 language file necessary for the ballot printing. For this specification, the release level of the VTS Software **MUST** be at least Release 1.92 Patch 11.

2.2 Associated Documents

- Table 1 - Background Color Selections (PANTONE® PMS Solid Colors Uncoated)
- Figure 1 - Ballot Template Cut Mark Layout (not to scale)
- Figure 2 - Restricted Zone Ballot Layout (not to scale)

3. Ballot Characteristics

3.1 Materials - The ballot shall be constructed with Index card stock. No embossed or printed patterns, or smudges shall be present. The ballot stock is NOT to be "pre-scored" for folds. See Section 8 for ballot scoring specifications.

3.2 Basis Weight - The weight of the paper stock can be between 90 lb bond to 110 lb. bond

3.3 Physical Dimensions - The physical ballot size and tolerances are as follows:

3.3.1	Width	8.500 in.	+ 0.030 in. - 0.020 in.
3.3.2	Length	11.000 in.	+ 0.060 in. - 0.000 in.
		14.000 in.	+ 0.060 in. - 0.000 in.
		18.000 in.	+ 0.060 in. - 0.000 in.

3.3 Physical Dimensions (cont.)

3.3.3 Thickness (Caliper)

0.0070 in. to 0.0090 in. \pm 0.0005 in.

NOTE : Thickness dimension is in ten thousandths of an inch NOT one thousandths of an inch.

3.4. **Ballot Cutting** - The cutting of the ballot must be kept within the printed "cut tolerance marks" as shown on Figure 1. These marks are 0.030 in. (approximately 1/32 in.) wide by 0.125 in. (1/8 in.) long. They specify the four corners of the ballot on both sides. When the ballot is cut to its proper size, a small portion of these marks (approx. 0.010 in.) **MUST** still be present on all four corners of the ballot's edges on both sides of the ballot. Accurate front to back registration of the printed image will improve the vendor's ability to meet the ballot cutting specifications.

3.5 **Ballot Curl** - The curl of the ballot shall be measured from a flat reference surface. The maximum allowable curl of the ballot measured from the flat surface to the most protruding point of curl on the ballot is 0.050 in. This dimension applies to the ballot in both face up and face down orientations.

4. Printing

In the restricted zones of the ballot layout, only allowable background colors (see Section 4.1) and black non-reflective ink (see Section 4.2) will be used for printing as specified by each of the restricted zone descriptions (see Section 5). Outside of the restricted zones, any color, ink, or watermark pattern may be used.

4.1 **Background Colors** - The allowable background colors are listed in Table 1. They are defined by the PANTONE® Color Management System (PMS). The selections in Table 1 are taken from the PANTONE® Color Selector 1000 / Uncoated. The number or name listed on the left of each color is the PMS color specification. The color names to the right of each PANTONE® listing are an interpreted description of the PANTONE® color swatches under fluorescent lighting (D50 illuminant). Any color descriptions containing two color names (e.g. GREEN/YELLOW) indicate the major color component on the left and the minor color component on the right.

4.1.1 **Restrictions** - The following describes the background color restrictions for any particular ballot. For each ballot, all of the restricted zones in the ballot layout must be of the same uniform color and density. The background color for the restricted zones must be selected from Table 1. In the restricted zones, only one of the available colors in Table 1 can be used per ballot. Outside of the restricted zones, any color or watermark pattern can be used. Please see Section 5 for the specifications of the restricted zones of the ballot layout.

4.1 Background Colors (cont.)

4.1.2 **Color Matching Tolerances** - In the restricted zones, the color selection must be printed within a tolerance match of $\pm 4\Delta e$. It is recommended that the vendor use a reflective densitometer to check the color and that, throughout the production run, samples are periodically checked against the standard PMS color swatch.

4.2 **Black Ink** - Black ink is used to print critical data elements such as the timing marks, diagnostic marks, and ballot ID marks. Black ink can also be used to print the voting position ovals. Black ink shall have a maximum reflectance of 5% at 620 nanometer wavelength (an ink normally containing a significant amount of black carbon in its formula).

NOTE: Reflectance measurements are referenced to 100% absolute white. (i.e., not paper white).

5. Restricted Zones and Critical Marks

The layout of the ballot contains restricted zones where specifications must be held within the tolerances. Deviations from the specifications can affect the accuracy of the scanning of the ballot. The following subsections individually describe the restricted zones. For visual reference, see Figure 2.

5.1 **Calibration Zones** - The calibration zones are the areas on the top and bottom of both sides of the ballot. This equates to four zones. Each calibration zone is defined as the following area:

[0.260 in. from the cut edge of the ballot],
by
[the full width of the ballot (8.5 in.)]. See Figure 2.

5.1.1 **Text and Watermarks** - No text or watermark patterns can be printed in any of these four zones.

5.1.2 **Background Color** - The calibration zones must be uniform in color and density. See Section 4.1 for color restrictions.

5.1.3 **Marks** - No black ink (see Section 4.2) is to be used in any of the calibration zones. No marks, text, or smudges can exist in the calibration zones except for portions of the cut tolerance marks (see Section 3.4).

5. Restricted Zones and Critical Marks (cont.)

5.2 Timing Mark Zones - The timing marks are the black rectangular marks (0.191 in wide by 0.063 in. height) that run along both sides of the ballot, front and back. This equates to four zones. The timing marks are spaced apart 0.250 in. from their centers. Each timing mark zone is defined as the following area:

[the full length of the ballot (8 in., 14 in. or 18 in.) minus the calibration zones],
by
[0.125 in., from the center of each timing mark column, to either side of the timing mark column]. See Figure 2.

5.2.1 Text and Watermarks - No text or watermark patterns can be printed in any of these four zones.

5.2.2 Background Color - The timing mark zones must be uniform in the background color and density. See Section 4.1 for color restrictions.

5.2.3 Marks - Black ink (see Section 4.2) is to be used to create the timing marks. The printed marks are to have sharp edged boundaries and are to be of uniform density. No marks, text, or smudges can exist in between the individual timing marks or above and below each timing mark column.

5.3 ID Mark Zones and Diagnostic Mark Zones - The ID marks are the black rectangular marks (0.191 in. wide by 0.063 in. height) that run across the bottom of the ballot, front and back. The presence or absence of ID marks is different for each ballot style. The diagnostic marks are the black rectangular marks (0.191 in. wide by 0.063 in. height) that run across the top of the ballot, front and back. This full row of diagnostic marks is always the same for every ballot style. This equates to four zones. Each of these zones is defined as the following area:

[between the timing mark zones on each face of the ballot],
by
[0.092 in. above and below the center of each row of ID marks and diagnostic marks]. See Figure 2.

5.3.1 Text and Watermarks - No text or watermark patterns can be printed in any of these four zones.

5.3.2 Background Color - The ID mark and diagnostic mark zones must be uniform in the background color and density. See Section 4.1 for color restrictions.

5.3 ID Mark Zones and Diagnostic Mark Zones (cont.)

5.3.3 Marks - Black ink (see Section 4.2) is to be used to create the ID marks and diagnostic marks. The printed marks are to have sharp edged boundaries and are to be of uniform density. No marks, text, or smudges can exist in between the individual ID marks or in the 0.060 in. margin above and below each ID mark row and diagnostic mark row.

NOTE: The ballot identification text must be no closer than 0.060 in. to the ID mark row (see Section 6.2).

5.4 Voting Position Zones - The voting position ovals are the marks that outline the data area to be filled in by the voter. Although the voting positions usually follow a column, each voting position can be considered a zone defined as the following area:

[0.125 in. to either side of the center of each oval],
by

[0.100 in. above and below the center of each oval]. See Figure 2.

5.4.1 Text and Watermarks - No text or watermark patterns can be printed in any of the voting position zones.

5.4.2 Background Color - The voting position zones must be uniform in the background color and density. See Section 4.1 for color restrictions.

5.4.3 Marks - Any visible color (with sufficient contrast relative to the background color), including black ink (see Section 4.2) can be used to create the voting position ovals. The oval's line thickness cannot exceed 0.002 in. The printed ovals are to have sharp edged boundaries and are to be of uniform density. No marks (other than the oval line), text, or smudges can exist inside each voting position zone.

6. Non-Restricted Zones and Non-Critical Marks

6.1 Non-Restricted Zones - Any area(s) NOT listed or described in Section 5 are considered non-restricted zones. The background of these non-restricted zones can be any color or halftone. Any type of text, marks, and/or watermark patterns can be placed in these zones.

6. Non-Restricted Zones and Non-Critical Marks (cont.)

- 6.2 **Ballot Identification Text** - Ballot identification text that can optionally be placed below the ID marks on the front and back of the ballot must be positioned as shown in Figure 2. The bottom of the text must not penetrate the calibration zone and the top of the text must be no closer than 0.060 in. to the ID marks. The height of the text must be no greater than 0.100 in (typically an 8 point font). The text can be printed in any color, including black ink (see Section 4.2).
- 6.3 **General Text** - General text (e.g., headers, footers, candidate and race names) can be printed in any color or halftone, including black ink (see Section 4.2), or any font size as long as the text does not penetrate any of the critical zones listed in Section 5.
- 6.4 **Watermarks Patterns and Striping** - Watermark patterns and striping can be printed in any color or halftone as long as the watermark pattern and/or striping does not penetrate any of the critical zones listed in Section 5.

7. Printed Image Registration

The front to back printed image registration will be within tolerances as long as the specifications for the ballot cutting (cut tolerance marks) have been met (see Section 3.4).

8. **Folds and Ballot Scoring** - Scoring for folded ballots must occur in between timing marks. Scoring cannot occur anywhere on the timing marks. The scoring must align with the equal and opposite side of the ballot. For example, if the score was to start in between the 10th and 11th timing mark on the left side of the ballot, the score must then end in between the 10th and 11th timing mark on the right side of the ballot. This alignment must also occur on the reverse side of the ballot. Accurate printed image registration and ballot cutting will improve the vendor's ability to meet the specifications for ballot scoring.

NOTE: The location of score lines on the GLOBAL template is for convenience. Scores should be placed on the ballot to accommodate local envelope sizes. It should be noted that the less folds on the ballot, the better. Additionally, ballots may NOT be printed on "pre-scored" ballot stock.
