RE: File No. 7384 – Citywide Senior Center Roof Replacement - Addendum No. 5

This addendum is comprised of:

1. Clarification
2. Question and answer

Clarification: Divisions 26 Electrical and 05 Structural Steel Framing: The electrical scope of work is to provide photovoltaic panels and all electrical connections and equipment for a complete installation of this photovoltaic array, as shown on the drawings and specifications. Due to dimensional differences between the Basis of Design photovoltaic panels and specified equal products, coordination is required between the electrical scope of work and structural steel framing to ensure the structural steel dimensions are coordinated to accept the photovoltaic panel system spacing requirements, and required location and quantity of penetrations in the steel columns.

The following question was submitted and answered:

Question: Was there a photovoltaic installer or electrical contractor that the architect worked with during design that could provide pricing?

Answer: The City has contacted local photovoltaic design and install firms.

All other details remain the same.

A handwritten signature in cursive script that reads "Amy L. Witts".
